

FOR SALE

Viscount Unicorn CLV8 organ (2008) in fantastic condition, including sound box

£5750

The CLV 8 is a three-manual organ with 32-note pedalboard, 50 registers + 4 orchestral registers, equipped with a laminate cabinet and roll-top key-cover. Ideal for the advanced student or medium-sized church, it has an extensive library of internal registers through which the user can easily customize the instrument.

Developed with the award-winning and patented Physis® physical modelling technology, which reproduces the physical phenomena involved in the sound generation of the pipe organ, the CLV 8 is capable of generating the highest-fidelity, most authentic church organ sound.

Parameter settings are easy to access, modify and store through the graphic display on the front panel. The “Action Tracker” style keyboard accurately detects touch by obtaining the speed of actuation of the keys, making it possible to feel a “Tracker Touch” effect, i.e. the correlation between the “touch” of the organist and the transient attack of each virtual pipe.
